

CASE #1 - National Defence Stakeholder

Managing an inventory of measuring instruments

#Challenge

Trescal manages calibration operations for a French Defence customer which has decided to **optimise its asset management** for **60,000 instruments**.

The solution shall enable the customer to easily manage this new process with an **efficient user experience**.

#Solution

Trescal developed a **powerful search engine** to make processes efficient.

Trescal **created a technical database** containing the brand/model/options/characteristics of the available devices.

The tool enabled the customer to reduce the number of required instruments **allowing direct cost reduction**.

#Summary

Optimised asset management for 80% of equipment managed

18 months rapid implementation

4 dedicated technical experts

48 000

electrical measurement instruments documented
